HOUSING AND POPULATION CENSUS

Republic of Mauritius

Volume VI: Educational Characteristics

October 2024

FOREWORD

This report is the sixth in the series showing the results of the 2022 Housing and Population Census. The first was published in June 2023 and contained the results of the Housing Census which preceded the Population Census by a few months. The previous four reports covered the demographic and fertility characteristics, the geographical and migration characteristics, disability and households characteristics of the population. This report presents data on the educational characteristics of the population.

Data published in this report have been prepared at different geographical area levels. The code in the left-hand margin of the table of contents indicates the geographical level at which the tables are presented, namely, I: Island level, D: District level and R: Municipal Council Ward and Village Council Area level.

Like all census data, the figures presented in the tables may still contain slight inaccuracies, which will be too costly to identify and correct. However, these do not in any way detract from the quality of the data and their usefulness. It is hoped that the present report will be particularly useful to administrators, planners and policy makers, and the public in general.

I wish to express my sincere gratitude to all persons and organisations who have contributed in one way or another to the success of the Census. In particular, I am thankful to members of the general public for their co-operation, the census field staff, United Nations Population Fund (UNFPA), United Nations Economic Commission for Africa (UNECA) for technical support, U.S. Census Bureau for IT support, the Kenya National Bureau of Statistics (KNBS) for lending the tablets used for data collection and my own staff.

M. Dawoonauth

Introduction

1. Background

The history of census taking in Mauritius dates back to the eighteenth century. The Population Census conducted in year 2022 was the nineteenth for the Island of Mauritius and the ninth for the Island of Rodrigues.

2. Strategy

The 2022 Housing and Population Census, which cost about 400 million rupees and mobilized some 7,000 field officers, was taken in two distinct rounds: the Housing Census followed by the Population Census. The main reason for adopting this procedure was to obtain at the Housing Census a list of names and addresses of heads of households which served as frame for the Population Census.

The Housing Census was conducted between 30 April and 20 June 2022 and the Population Census between 19 June and 01 August 2022 in respect of all persons alive on the night of 3 - 4 July 2022.

The Population Census questionnaire, a copy of which is at the end of the report, was filled in by fieldstaff on tablet with information provided by respondents. The data collection exercise was done using the Computer Assisted Personal Interview (CAPI) method. The CAPI programme was initially developed by the U.S. Census Bureau and later on by the UNFPA with support from Statistics Mauritius (SM) staff. This was the first time Statistics Mauritius made use of tablets to collect Census data. Some basic validations were in-built in the CAPI programme but more extensive validation and tabulations were done using the software Census and Survey Processing System (CSPro) developed by a UNFPA consultant with support from SM staff.

3. Coverage

The Housing and Population Census covered the Islands of Mauritius, Rodrigues and Agalega. As regards St Brandon, only a count of persons spending the census night was made; these islands are mainly fishing outposts, with no permanent residents.

4. Population enumerated

The Census counted all persons present on Census night in all private households and communal establishments, including collective quarters, as well as usual residents who were absent on Census night. Combinations of answers to questions asked on whereabouts and usual address allowed for the computation of both the present population (de facto) and the resident population (de juré) counts.

At the 2022 Census the "de facto" population was 1,242,003 in the Republic of Mauritius whereas the resident population was 1,233,427. Census tables, unless otherwise stated, show the resident population; the distribution by the different islands was as follows:

Island	Area (sq. km)	Male	Female	Both Sexes
Island of Mauritius	1,868.4	586,450	603,043	1,189,493
Island of Rodrigues	110.1	21,311	22,293	43,604
Agalega	2.7	167	163	330
St Brandon	26.0	-	-	-
Republic of Mauritius	2,007.2	607,928	625,499	1,233,427

None of the published tables include Agalega and St. Brandon. The exclusion of the very small resident population in Agalega does not affect the usefulness of the tables. As for St. Brandon, there were no permanent residents at the time of the census, although some fishermen, were present on the island on Census night.

5. Area level of tabulation

Different area levels of tabulation are used in this publication. An indication on the area levels at which tables are presented is given in the table of contents.

Several census tables have been prepared down to the level of Municipal Council Wards or Village Council Areas (MCW/VCA). Maps showing boundaries of the Municipal Council Wards and Village Council Areas are included in the Appendices together with a list of these areas within each district and their codes. All Municipal Council Ward and Village Council Area boundaries are given as they were on 3 July 2022, and all census data are in relation to these boundaries. Comparison of the 2022 Census data with the 2011 Census data at MCW/VCA level should be made with caution since there have been revisions of boundaries between the two censuses.

As regards Rodrigues, six local regions grouping adjacent localities were demarcated at the 2022 Census and some tables are published accordingly. A map showing the boundaries of these six local regions as well as a list of localities found therein are included in the Appendices.

6. Publication of results

The Housing Census data were published in June 2023 as Volume I of the series of the 2022 Census reports. Volume II dealt with the demographic and fertility characteristics of the population, Volume III dealt with geographical and migration characteristics, Volume IV dealt with disability while Volume V dealt with households characteristics. This report contains data on educational characteristics, and will be followed by the publication of an additional report on economic characteristics of the population.

7. Concepts, definitions and classification

- (a) Household
- A household is either:
- (i) a one-person household, i.e., a person who makes provision for his own food or other essentials for living without combining with any other person to form part of a multi-person household; or
 - (ii) a multi-person household, i.e., a group of two or more persons living together who make common provision for food or other essentials for living. The persons in the group may pool their incomes and have a common budget to a greater or lesser extent; they may be related or unrelated persons or a combination of both.
- (b) Family nucleus
- A family nucleus is either a couple with or without unmarried children, or a lone parent with unmarried children.
- (c) Household type
- One-person household is defined as a private household with only one usual resident.
- A nuclear household is defined as a private household consisting entirely of a single-family nucleus.
- An extended household is defined as a private household consisting of any one of the following:
- (i) a single-family nucleus plus other persons related to the nucleus
 - (ii) two or more family nuclei related to each other, without any other persons
 - (iii) two or more family nuclei related to each other with other persons related to at least one of the family nuclei
 - (iv) two or more persons related to each other, none of whom constitute a family nucleus.

A composite household is defined as a private household consisting of any one of the following:

- (i) a single-family nucleus plus other persons, some or none of whom being related to the nucleus
- (ii) two or more family nuclei related to each other, plus other persons, some or none of whom being related to any of the nuclei
- (iii) two or more persons related to each other, none of whom constitute a family nucleus plus other unrelated person
- (iv) two or more family nuclei not related to each other
- (v) Non-related persons only.

- (d) Enumerated population This category includes all persons who spent census night in the household (whether private or communal) as well as persons who usually live in the household but were absent on census night.
- (e) Present population This category includes all persons who spent census night in the household.
The total of all persons present is generally referred as the ‘de facto’ population.
- (f) Resident population The resident population is a count of all usual residents of a country at the time of the census. For census purposes, “usual residence” is defined as the place at which the person lives at the time of the census, and has been there continuously for the past 12 months or intends to live there continuously for at least 12 months.
The total of all usual residents is generally referred as the ‘de juré’ population.
- (g) Languages read and written (literacy) Persons were asked to state the language(s) in which they could, with understanding, both read and write a short, simple statement in their everyday life.
- (h) Educational attainment For persons not attending school, this refers to the highest level of education completed, whereas for persons attending school, it refers to the standard, form, grade or course being attended.

Highest qualification other than Primary or Secondary that leads to a certificate, diploma or degree and above has been classified under the appropriate level.

(i) Disability

Persons were asked about the difficulties they may have, as listed below, while doing certain activities because of health problem. They were asked to report all disabilities that they had, and the severity.

The classification used for tabulation is as follows:

- EYE - Seeing even if wearing glasses
- EAR - Hearing even if using a hearing aid
- MTION - Walking or climbing stairs
- LEARN - Remembering or concentrating
- PERSONAL CARE - With self-care such as washing all over or dressing
- SPEECH - Communicating using his/her usual language, for example understanding or being understood by others
- MANU - With manual activities such as gripping and holding
- BEHAVIOUR - Such as disturbances of behaviour, including antisocial behaviour, maladjustment and liability to self-injury.

However, each disabled person was counted only once, depending on the type of disability(ies) he/she had and the order in which the type of disability(ies) were tabulated. Similar to previous censuses, for comparability purposes, the following order was applied when classifying disabled persons so that they fall in only one category even if they had more than one disability:

1. MTION only
2. MANU only
3. MTION & MANU
4. EYE only
5. EAR only
6. EYE & EAR
7. SPEECH
8. EAR & SPEECH
9. LEARN
10. BEHAVIOUR
11. PERSONAL CARE
12. OTHER

Response categories on severity were: (i) None, and if “Yes”: (ii) Some difficulty, (iii) A lot of difficulty, and (iv) Cannot do (the activity) at all.

- (j) Currently employed This category includes (i) any person, aged 16 years and over who worked for at least one hour during the week from Monday 27 June to Sunday 3 July 2022, and (ii) any person who held a job during that week although he/she did not do any work. Work means any work for pay, profit or family gain, including self-employment with or without employees as well as work without pay in a family enterprise or farm; but it excludes housework in one's own home.
- (k) Currently unemployed These are persons aged 16 years and over who had not worked for at least one hour during the week from Monday 27 June to Sunday 3 July 2022, and did not hold a job during that week, and took active steps to look for work anytime during the previous 4 weeks, and were available for work during the week ending 3 July 2022.
- (l) Currently active This category consists of the currently employed and the currently unemployed population.
- (m) Currently inactive This category consists of persons who were currently neither employed nor unemployed.
- (n) Occupation This was the job at which the person worked the most hours during the reference period. The National Standard Classification of Occupations, an adapted version of the 2008 International Standard Classification of Occupations was used for coding.
- (o) Kind of business, industry or service This was the kind of business, industry or service activities carried on at the person's place of work. The National Standard Industrial Classification of Economic Activities, based on the International Standard Industrial Classification of Economic Activities – ISIC Rev.4 of 2007, was used for coding.

Note:

Due to the onset of COVID-19 pandemic in 2020 and 2021, the country was under lockdown during specific periods resulting in the closure of educational institutions from primary to tertiary levels for durations extending beyond the lockdown period. When schools eventually resumed on a face-to-face basis, it was on a staggered basis, that is, arrangements were made for students to attend schools only two or three days per week, depending on which Grade they were in. This undoubtedly disturbed the school calendar.

Furthermore, to catch up on the learning loss, the school calendar was extended for two consecutive years, that is, the school year 2020 started in January 2020 and ended in March 2021 while the school year 2021 started in June 2021 and was extended to November 2022. There was no new academic year in 2022. Thus, any comparison of the 2022 Census data on education with that of 2011 should be made with caution.

REPUBLIC OF MAURITIUS
MINISTRY OF FINANCE, ECONOMIC PLANNING AND DEVELOPMENT
STATISTICS MAURITIUS
2022 CENSUS OF POPULATION (CENSUS NIGHT 3 - 4 July 2022)

Confidentiality

The census is being carried out under the provisions of Statistics Act and in accordance with the Data Protection Act, which guarantees the confidentiality of personal information.

Who should be counted?

- Every person who spends Census night 3-4 July 2022 on the household's premises, whether he or she is a member of the household, a visitor, a guest, a boarder or a servant.

- Every person who usually lives in the household, but was away on Census night; e.g.:
 - a) on night work, staying overnight or temporarily with relatives, friends, staying in secondary residence, resort hotel, in hospital, even if person is being enumerated elsewhere;
 - b) on vacation outside Mauritius;
 - c) on business trip;
 - d) studying abroad;
 - e) working abroad, provided his/her usual place of residence is still at this address

- Every person who arrives on the premises and joins the household on Monday 4 July 2022 without having been enumerated elsewhere.

Type of household/institution:

1. Single
2. Combined
3. Part of household
4. Hospital, infirmary, asylum, prison
5. Orphanage, old people's home, convent and others*
6. Hotel population
7. Collective quarters
8. Homeless
9. Vacant
10. Under construction
11. Ships, barges or other vessels
12. Naval forces, Air forces, Special Mobile Force or Police training force

* *Others include student dormitories/campus*

	Total	Male	Female	Undetermined
No. of Persons at Housing Census (HC)	-----	-----	-----	-----
No. of Persons at Population Census (PC)	-----	-----	-----	-----

Reason for discrepancy	Number		Number
Moved in (E.g. marriage, etc.)	Death
Merged Household	Split household
Birth	Left household (e.g. moved way, marriage, etc.)
Missed member at HC		
Newly formed household		
Household moved in from another address	Other
